Hi Cathy,

FYI: I've spoken to Pastor Hammond about the article in the paper and the desire of other environmental groups to reach out to the Administrator and others to stop the landfill. He says that is not representative of the leaders who signed the letter sent to the Agency. He knows of the groups and will reach out to them to discuss their issues and the representation of the community. It is hoped by reaching out to them, they can come together with one positive message. He has promised to keep me informed.

Thanks,

Tonya 😊

Glenn and L'Tonya,

We expect to get more of these form letters. We are updating the EPA ORR webpage with information about the additional public comment. We will take language out of the response letter. Samantha is taking the lead.

Cathy

This is a form letter, the third received so far. I expect more. We have a good standard response, and will prepare a letter.

Dear Sirs:

Bear Creek is a significant stream in the Lower Clinch watershed. DOE proposes to bury a wide variety of radioactive materials in a

landfill on Bear Creek. The exact contents of the hazardous waste have not been disclosed.

A revised plan for the proposed landfill should be issued by DOE. EPA can make DOE do that, and require the plan to be made available for public comment.

I urge the EPA to require the DOE to reopen public comment on this dangerous plan, so communities that live nearby can

have a voice in this process. Please have the DOE issue a revised plan for the proposed landfill.

Thank you for your attention to this significant issue.
